Asset > Import Assets :

Browse > Chercher le fichier > Validate Import > Import Assets

The screenshot shows the 'Import Assets' page in a software application. The top navigation bar includes links for Dashboard, Assets, Reports, Software, Scanning, Helpdesk, Base de Connaissances, Configuration, and Community. Below this, a 'Basic Actions' sidebar lists 'New Asset', 'New Location', and 'Import Assets'. The main content area is titled 'Import Assets' and features an 'Online Help' link. A file input field is followed by a 'Browse' button (labeled with a red '1'). To the right of the input field is a red '2'. Further right are 'Validate Import' and 'Import Assets' buttons (labeled with a red '3'). Below these buttons is a 'Download import template' link with a help icon. A large red '4' is positioned to the left of the main content area. The main content area itself contains the text 'Everything imported.' and a vertical scrollbar on the right side.
